

OCTEON TX2 Infrastructure Processor Family

Announcement of Next Generation Infrastructure Processors

OCTEON® TX2

OCTEON Fusion®

OCTEON TX2 Announcement

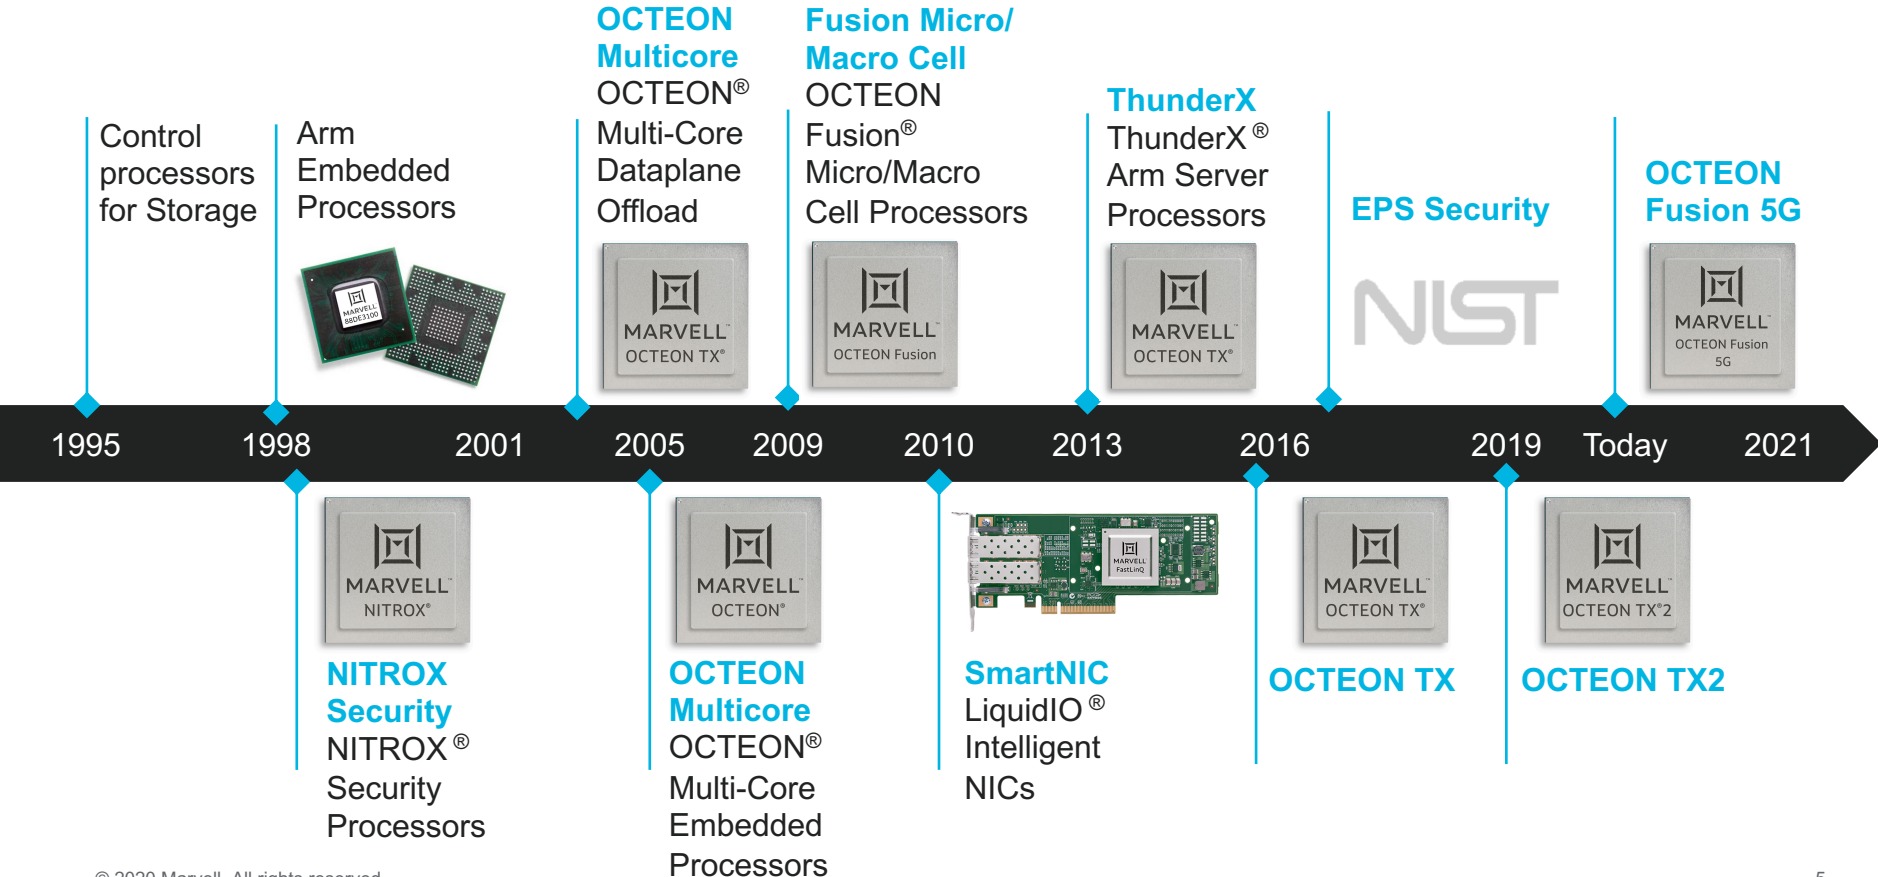

- Industry-leading data path performance up to 200Gbps for networking and security applications
- Up to 5 100G MACs integrated in the OCTEON TX2 infrastructure processor leading to significant TCO advantage
- OCTEON TX2 Infrastructure Processor family combines 4 to 36 Armv8-based architecture cores with configurable, programmable hardware accelerator blocks
- Fully virtualized SoC architecture Second line of text example
 - Cores, I/O and all data-plane acceleration engines are fully virtualized

OCTEON TX2 Announcement

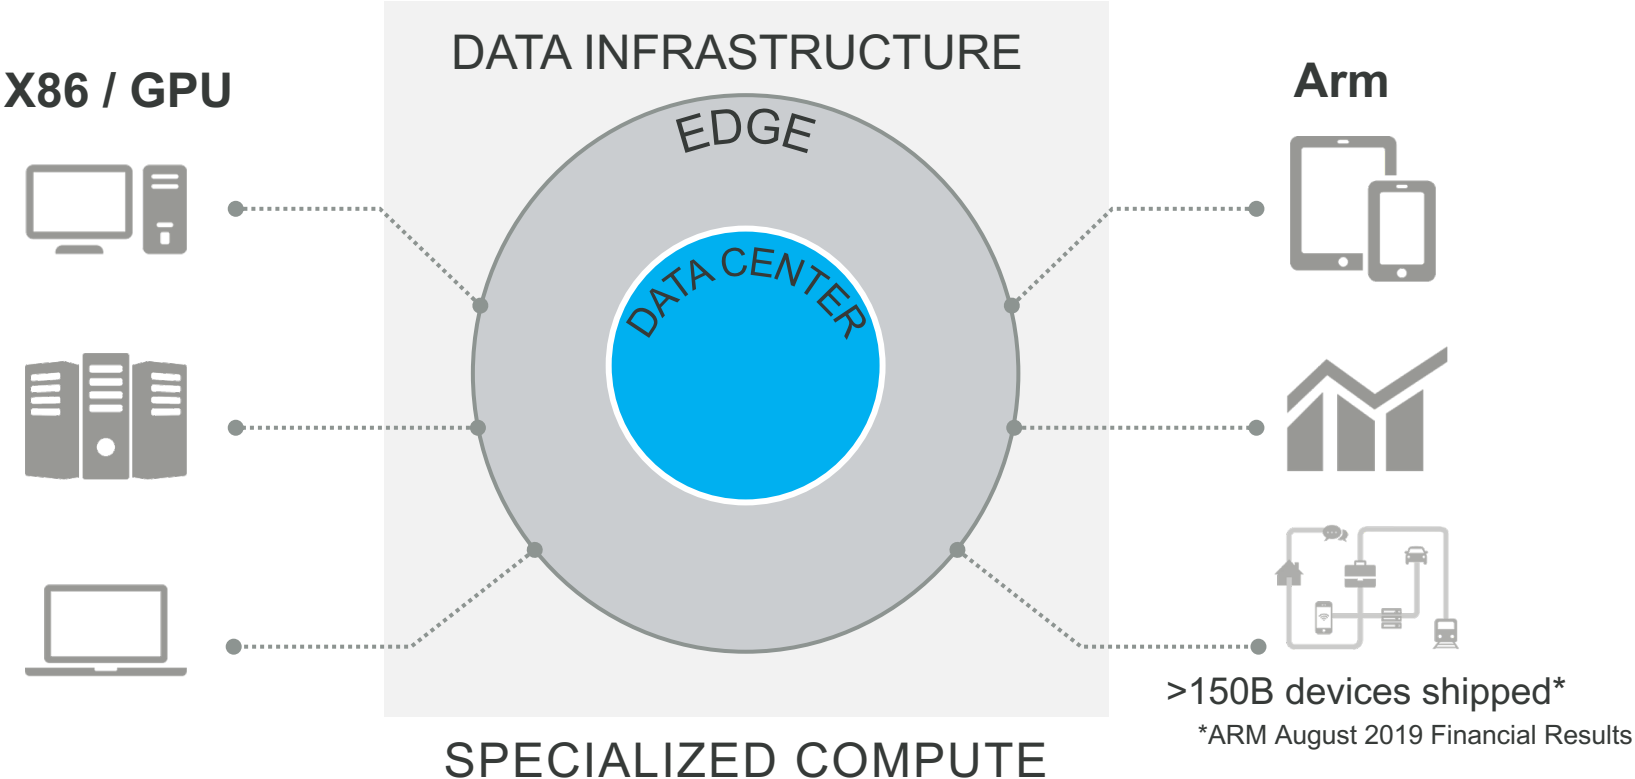

- Target Markets:
 - Enterprise Networking / security
 - 5G wireless infrastructure
 - Service provider / multi-access Edge compute
 - Cloud / Data Center

OCTEON TX2 Infrastructure Processor: CN98/96xx

Introducing the industry's highest performing Infrastructure Processor family

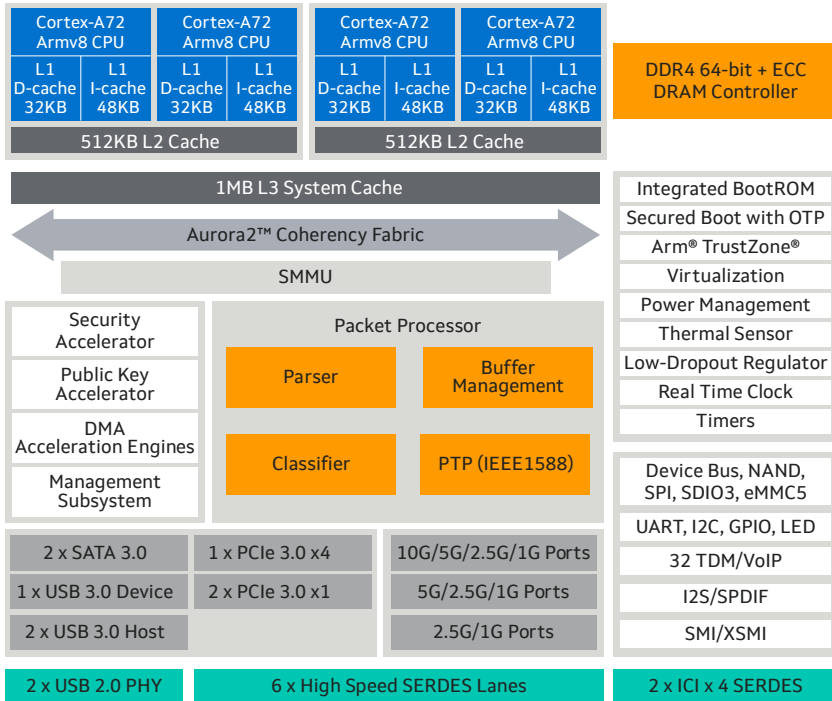

- Highest Compute (SPECINTRate) SOC in its class
- Multi-core scaling w/ low latency interconnect
- Rich I/O
- HW acceleration for packet processing, encryption

6x 72b DDR4-3200

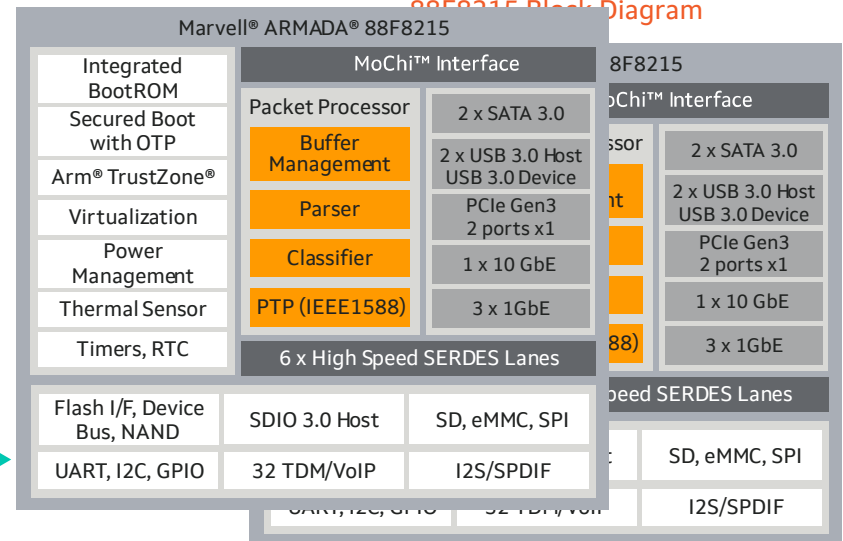

CN9130 – Best Performance/Watt Processor Targeting SOHO/SMB

CN9130 block diagram

- CN913X – Up to 4 cores (20 Gbps)
- Supports up to 18 SERDES lanes
- <10W power consumption
